PROFESSIONAL SUMMARY

Senior Full Stack Developer with 5+ years of experience building, scaling, and maintaining web applications. Strong expertise in React, Node.js, and API-driven architectures, with hands-on experience working with distributed systems and tools like Docker and RabbitMQ. Proven ability to deliver high-quality features, troubleshoot complex issues, and collaborate effectively in team environments to build reliable, scalable solutions aligned with business goals.

PROFESSIONAL EXPERIENCE

ProDoctivity SRL — Senior Fullstack Developer

April 2023 – Present

- Developed backend services and APIs using Node.js and TypeScript
- Managed system maintenance, bug fixing, and performance improvements
- Analyzed business and operational data to support decision-making
- Collaborated with cross-functional teams to deliver efficient and user-focused solutions
- Diagnosed and resolved complex issues using Docker environments, log analysis, and effective debugging techniques

Technologies:

React, TypeScript, Node.js, AWS, Docker, MongoDB, C#, Playwright.

Portal Digital TV — Infrastructure Manager

Sept 2023 – Present

- Led the end-to-end development of a digital news platform, from architecture design to production deployment
- Designed and implemented the application using Next.js, React, and TypeScript, ensuring scalability and performance
- Integrated backend services with Supabase, handling authentication, data management, and SSR workflows
- Established a full development workflow including testing strategy, linting, and type safety enforcement
- Built and maintained a CI/CD pipeline to automate integration, testing, and deployment
- Implemented development standards and tooling (ESLint, Husky, lint-staged) to ensure code quality and team consistency
- Optimized application performance and resolved production issues through systematic debugging
- Worked closely with stakeholders to translate business needs into scalable technical solutions

Technologies:

Supabase, React, Next.js, TypeScript, Tailwind CSS, Docker, CI/CD.

Consejo Nacional de Drogas — IT Support

Aug 2019 – Oct 2019

IT Support — Consejo Nacional de Drogas

- Provided technical support for hardware, software, and network-related issues across the organization
- Installed, configured, and maintained computer systems and office software
- Assisted in basic network setup and infrastructure maintenance
- Delivered user support and guidance to non-technical staff

Technologies:

Windows Server, SQL

Freelance Projects — Fullstack / Web Developer

Feb 2020 – April 2025

I have designed and developed websites for businesses, schools, and organizations, implementing SEO best practices including metadata optimization, structured content, robots.txt configuration, and other performance-enhancing features to maximize search visibility and user experience.

Examples:

<https://sosracismobizkaia.org/>.

Technologies:

Angular, TypeScript, C#, Docker, PostgreSQL, PHP, Figma, WordPress, Wix

PERSONAL PROJECTS

Parking Spot — Parking Management System

- Designed using a modular service-based architecture within a monorepo, ensuring scalability and maintainability
- Backend built with Node.js, Express, TypeScript, and MongoDB (Mongoose), implementing RESTful APIs with structured layers (controller, repository, model)
- Implemented JWT-based authentication with refresh token strategy using Passport.js
- Frontend developed as a Vue 3 SPA (Composition API + TypeScript) with a structured component and service layer architecture
- Applied Zod validation, centralized error handling, and consistent API response patterns across services
- Built a custom event-driven logging system for monitoring API activity and system events

Tech: NodeJs, TypeScript, MongoDB, Vue, JWT, Docker Compose.

Sinister Six — Pokemon Team Builder

- Built responsive web and mobile interfaces with React and React Native.
- Integration with an external PokeApi.
- Implemented monorepo structure with shared packages and CI/CD-ready setup.
- Established code quality standards (ESLint, Jest, commitlint).

Tech: Node.js, TypeScript, Express, Docker, React, React Native, Tailwind CSS.

SKILLS

Core Stack

- Frontend: TypeScript, Vue, React, Next.js, Angular
- Backend: Node.js, Express.js, PHP, Python, C#
- Databases: PostgreSQL, MongoDB, MySQL, SQL, Oracle

Architecture & Cloud

- Microservices, Monorepos, MVC, Clean , SOLID, Peer2Peer
- AWS (ECS, RDS, S3, CloudFront, Cognito, IAM, VPC)
- Docker, CI/CD, Terraform, NGINX

Tools & Practices

Development & Testing: Git, GitHub, GitLab, Postman, Swagger, Jest

Engineering Practices: Agile / Scrum, Extreme Programming, Code

Reviews, Technical Documentation

AI-Assisted Development: Claude, Cursor, GitHub Copilot,

EDUCATION

B.Sc. Software Engineering — INTEC (2019–2023)

Full Stack Development — Alterna Academy (2022)

LANGUAGES

- Spanish: Native
- English — Advanced (C2 – EF SET Certified)
